“The ‘Alchemy Seminar Series’ will be our major event of 2017. The term ‘alchemy’ denotes transformation, which is a cornerstone of the educational philosophy of Mary Elizabeth Wakefield and MichelAngelo. Whether it be transformation and healing of the facial landscape and our constitution, psycho-somatic-emotional healing with scar therapy, diagnostics, healing strategies and innovative treatment protocols based on the union of Western Astrology and East Asian Medicine, or the unique synergy of vibrational tools (tuning forks) in combination with acupuncture, this seminar series is set to bring transformational healing potential to your clinical repertoire. There is something here for each practitioner and student.”

I first studied with Mary Elizabeth & MichelAngelo in 2008. Almost 10 years later, I still use their methods regularly in clinic.”

Mary Elizabeth Wakefield

"It was fabulous! Mary Elizabeth is a wonderful teacher who has a very deep knowledge of her subject. She and MichelAngelo engaged, educated and entertained us. At the end, I felt I understood and could feel comfortable in the practice of the protocols developed by Mary Elizabeth. I'm looking forward to her next seminar."

D.S., TCM Practitioner, Braidwood, NSW, AUSTRALIA

An opera singer, classical composer, pianist, astrologer, healer, diviner and writer, **MichelAngelo** was a presenter at the **2011 Conference of the International Society for the Study of Subtle Energy and Energy Medicine (ISSSEEM)**. His article featuring a medical astrological analysis of **Elvis Presley's** birth chart from both a Western and Chinese medical perspective was published in the **2016 Fire issue of Oriental Medicine Journal**, his third astrological article to be published by OMJ. A fourth piece on pop star, **Prince**, and his death, will appear in the **2017 Fire issue**.

He has created a 3-part certification series, **Planetary Vibrational Medicine**, in which he synergizes **Western medical astrology** with **Oriental medicine theory and practice**, introducing a variety of vibrational methods of remediation (gem elixirs, tuning forks) to address constitutional balance and imbalance as it is reflected in the Western natal chart and identified through other astrological diagnostic strategies.

From 2006-13, **MichelAngelo** served as Advisor, Astrological Medicine & Musical Studies, to **Acutonics® Institute of Integral Medicine, LLC**. He was the principal creative collaborator, co-instructor and co-creator of advanced training seminars with sound healing pioneer Donna Carey. MichelAngelo has collaborated with **Mary Elizabeth Wakefield** on a wide range of educational seminars focusing on applications of Western and Eastern alchemy, essential oils and gem elixirs, and synergies of sound healing techniques with acupuncture needling. He has been her co-instructor on **4 continents – North America, Australasia, Europe, and Asia**, and has co-written articles with her for **Acupuncture Today, Oriental Medicine Journal, Spa Asia**, and others. He is also the co-creator of a series of **five Soundscapes training modules**, which present a synthesis of Oriental medicine-based facial and constitutional treatment protocols with the planetary landscape of Western astrological medicine.

"A very wonderful workshop, finally including facial acupuncture as an effective tool to address the mind, emotions and spirit, all within TCM theory and practice. In light of this, its effectiveness in improving the complexion and physicality of the face seems a mere positive side effect ... I was blown away by its content and presentation; Ms. Wakefield and MichelAngelo effectively address the most important disease affecting the human condition ... the decline and loss of the human spirit!"

Introduction to Scar Therapy "Alleviating the Long-Term Impact of Injury/Surgery"

1-Day Seminar presented by

Mary Elizabeth Wakefield, L. Ac., M. S., M. M.

Lecture 50% | Demonstration: 50%
13th August, 2017 | Brisbane, QLD
20th August, 2017 | Perth, WA
27th August, 2017 | Melbourne, VIC
3rd September, 2017 | Sydney, NSW

The essential 1-Day seminar for learning how to treat your patients' scars, which can improve your clinical outcomes!

Scars are the causes of prolonged effects that an injury or surgical site continues to have on the body. Despite the outward appearance of healing, patients continue to suffer from the residual impact of scar tissue formation long after the initial trauma/surgical trauma, and experience chronic pain and disability, both physical and psychological. They may frequently suffer discomfort in areas and bodily systems far removed from the actual site of the scar, and often find little relief in receiving conventional treatments.

Western medicine is particularly effective when addressing the impact of acute trauma, but medical orthodoxy regards the formation of a scar as the end result of the process, rather than an interim phase on the road to a more complete recovery from the injury. Consequently, there are few strategies in place for alleviating the long-term effects of these disturbances of the skin and underlying tissues.

Research indicates that acupuncture lessens the pain of the scar, breaks up adhesions, which pull on the organs, tissue and muscles, and regenerates the nerves and tissues. Acupuncture needling increases circulation and facilitates oxygenation of the cells in the affected area, having far reaching effects on the systems impacted by the disturbance created by the scar.

As acupuncturists, we have the perfect tools to treat scars to assist the body's healing. If you are not currently familiar with acupuncture scar treatments, you are missing an important opportunity for your patients' healing with this essential skill-set.

In this 1-Day Seminar, the participants will learn:

- The medical explanation of scar formation from an Oriental Medicine Perspective
- How to recognize and treat different types of scars in all areas of the body
- Physiological factors that affect healing
- The side effects of scar adhesions
- Why memory of the original trauma, accident or surgery can trigger emotional releases in some patients
- When to begin treating a scar
- Techniques for treating old and new scars
- Acupuncture, plus other scar treatment modalities
- Topical application of vitamins, essential oils, herbs, etc. to enhance healing
- Protocols for treatment of internal (laparoscopic) vs. external scarring
- Specific palpation techniques for assessing scars

Mary Elizabeth will lecture on the above topics and demonstrate various scar therapy techniques on relevant seminar attendees from the audience.

A medical intake and release form must be filled out and signed by the participants of seminars participating in demonstrations.

Which practitioners/students will benefit from attending this seminar?

- Practitioners wishing to refine and develop their scar treatments
- Practitioners and students who are currently unfamiliar with and wish to develop a foundation in scar treatments to broaden their depth of healing in their patients
- Practitioners wishing to attend a one-day clinically applicable seminar with an esteemed international presenter, who are not able to attend other seminars in the series

“Harmonizing the Body Human with the Music
of the Spheres”

1-Day Seminar presented by

Lecture 75% | Demonstration: 25%
12th August, 2017 | Brisbane, QLD
26th August, 2017 | Melbourne, VIC

Western astrological medicine views the body as a planetary landscape, assigning to its structural constituents, processes and pathologies, specific astral signatures. The astrological natal chart has historically been examined for evidence of the type of constitutional disharmony that would be familiar to an acupuncturist, or other practitioner of Oriental medicine. This might be evidenced by elemental balance/imbalance of the 4 Western elements, “negative” aspects between planets, large scale aspect patterns as indicative of specific syndromes, strength/weakness of individual planets, etc., as well as stresses brought about by ongoing planetary transits.

By contrast, Oriental medicine categorizes the human organism as an arrangement of pathways of vital force (Qi), the meridians (and the points that comprise them) that link the various parts of the body and function as an integral aspect of the energetic structure. These meridians relate to organ systems, the Zang-fu, which do not necessarily correspond with Western medicine’s physiological and biological organs, but nevertheless share some of the same associations. Human anatomy and functioning as illustrated via the meridian network is indeed sophisticated and many faceted, presenting the practitioner with a topography of incredible complexity and poetic resonance.

Planetary Vibrational Medicine™ An Introduction to Western Medical Astrology for Acupuncturists presents a unique synergy of traditional Western medical astrology with Oriental medicine theory and practice. In addition to the astrological fundamentals, the content of the course provides the Oriental medicine practitioner with information concerning non-traditional interpretive approaches to the Western natal chart, utilizing symbolism with which they are already familiar – 5 Element planetary balance and imbalance, disharmonies involving the 12 Regular meridians and the associated Zang-fu organs, and a planetary model of the chakras. As a bonus, MichelAngelo will also offer his original astrological model of the 8 Extraordinary meridians, with associated planetary signatures.

The information derived from these analyses, depending on one’s modality can then be applied for use in acupuncture treatments or vibrational bodywork treatments that employ Acutonics® planetary tuning forks on the points and meridians of acupuncture, and other energetic systems.

Highlights of the course include:

- Brief introduction to the basics of Western medical astrological analysis.
- A synergetic approach to the natal chart using Oriental medicine symbolism – 5 Elements, 12 Regular meridians and the associated Zang-fu organs
- How to identify possible medical conditions as they relate to constitutional imbalances in the natal chart and the individual’s Oriental Medicine diagnosis.
- A brief introduction to sound therapy and music theory
- An overview of Acutonics® planetary tuning forks
- 3 useful planetary treatment protocols using Acutonics® planetary forks that may also be transposed into acupuncture treatments for those acupuncturists who do not use tuning forks.
- Bonus!! An Eight Extraordinary meridian model of the natal chart.

MichelAngelo will lecture extensively on the above topics, and will also perform an in depth case study and analysis on the natal chart of one of the seminar participants from a medical perspective, projecting it on the screen for the audience to understand the diagnostic process in action. This will be followed by a vibrational bodywork treatment utilizing the Acutonics® planetary tuning forks, incorporating the signatures relevant to the individual’s health-related challenges, as derived from a consideration of natal chart imbalances or stressful planetary transits.

A medical intake and release form must be filled out and signed by the participants of seminars participating in demonstrations

Which practitioners/students will benefit from attending this seminar?

- Practitioners and students wishing to use information available in the Western natal chart to assist in understanding the constitution of their patients and add an additional diagnostic tool to their repertoire
- Practitioners who have a strong interest in Western Astrology, and its medical applicability
- Practitioners and students who are wishing to expand their scope of Oriental Medicine to encompass the correlations of the Western Astrological Model

Please Note: Acupuncturists can use needling techniques, and do not need to purchase Acutonics® tuning forks to utilize the suggested treatment protocols in their clinics.

However, to learn about treatments utilizing needles and Acutonics® tuning forks, please consider attending the forthcoming seminar in Vibrational Acupuncture: Integrating Tuning Forks with Needles™. These skills may be applied to treatments which incorporate medical astrology.

3-Day Seminar presented by

Mary Elizabeth Wakefield, L. Ac., M. S., M. M. & MichelAngelo, M. F. A., C. T. M.

Hands-on 70% | Demonstration + Lecture: 30%
17th -19th August, 2017 | Perth, WA

This seminar focuses on advanced needling techniques for the face and body, which include: intradermal and scar needling, threading, needle depth and insertion techniques, and extensive work with muscle structure and facial motor points.

These protocols are very effective for Facial Renewal™ and for other syndromes, such as: Bell's palsy, stroke, post-operative neuropathies, trigeminal neuralgia, etc.

It should also be understood that by treating the face we also create profound healing effects on the body on a constitutional level, just as treating the body constitutionally has an effect that will be radiated through the face. Integrating facial-needling techniques into your practice will greatly assist in the holistic healing process of your patients.

In this 3-Day Seminar, the participants will learn:

- The energetics of the face: Jing, Qi and Shen
- Anatomy and physiology of the skin
- Definition and function of, and guidelines for, motor point usage: an Oriental medicine perspective
- Contraindications and benefits
- Needling techniques for 21 motor points for facial syndromes
- The emotional landscape of each motor point: "The Shen leads the Qi"
- 5 Element pathology and constitutional needling protocols
- Advanced Chinese physiognomy
- Business guidelines
- How to use a topical Chinese herbal protocol with soothing botanicals, essential oils, hydrosols and jade rollers

An open book quiz will be administered at the end of the course, which will consist of a physiognomical analysis of a celebrity, based upon a series of photographs. The participants will ascertain the individual's 5 Element constitutional profile by observation, assess the visible signs of aging, and then devise appropriate constitutional and facial treatment strategies based upon their assessment. MichelAngelo will guide them through the process, and then lead a group discussion.

Mary Elizabeth will demonstrate the full protocols and fellow participants will practice these techniques by giving and receiving a treatment.

A medical intake and release form must be filled out and signed by the participants.

Which practitioners/students will benefit from attending this seminar?

- Practitioners and students wishing to perform international standard facial acupuncture treatments on their patients.
- Practitioners and students wishing to treat the body more holistically by integrating treatments that involve the face, and also treat the face holistically using constitutional body treatments.
- Practitioners and students wishing to advance their current skillsets in facial acupuncture, or gain new skillsets to add to their clinical repertoire.

"...the face is a somatic microsystem that provides the Oriental medicine practitioner with a means to gauge the changing dynamics of individual health. From an anatomical perspective, this most personal aspect of identity serves as a direct interface between the human organism and its environment. We can regard a person's face as presenting an authentic "portrait" of their qi, manifesting a corollary to the timeless axiom 'as above, so below.' We could also express this: 'as within, so without.'"

This innovative approach uses Acutonics® Ohm tuning forks on the face and body in conjunction with acupuncture needles. The vibrational Qi of sound enters the body via the acupuncture points and meridians; this effect is enhanced by both the sound conductivity of the skeletal structure and the watery consistency of the body. The human body is comprised of 80% water, and sound travels 4 times faster in water than in air. Consequently, sound vibration readily communicates with the Water element via the Kidney meridian, permeating the most profound level of essence – the Jing. This method provides the patient with a perfect balance of vibrational harmonizing with tuning forks, combined with the clinically effective benefits of acupuncture, resulting in a very unique and complete healing system that yields outstanding clinical results. The treatment protocols learned in the seminar will equip attendees with powerful techniques for both face and body. This is a great opportunity to start adding a vibrational component into your acupuncture treatments.

In this 3-Day Seminar, the participants will learn:

- How to differentiate and define vibration, sound and music
- Benefits/contraindications for acupuncture and sound resonance
- Acu-sound guidelines: when to use needles, tuning forks or to synergize
- The Art of Intervals
- The tone, keywords and the planetary glyph of Earth
- Acu-sound protocols for the Eight Extraordinary meridians
- A 3-Treasure Grounding Protocol with special faceted gem tips
- Ohm Balancing Facial treatment
- “Mu-Shu Tango”; using Kidney Spirit Points and Back-Shu points
- Specialized Acu-sound constitutional treatments, using the Yuan-source points
- Physiognomy: Balancing the corpus callosum with sound
- How to use a full topical protocol with 5 Element Planetary essential oils (infused with gems), soothing botanicals, hydrosols and jade rollers

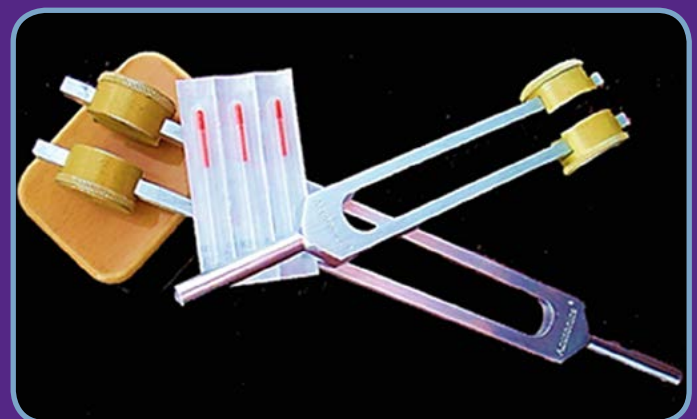

Mary Elizabeth will demonstrate the full protocols and fellow participants will practice these techniques by giving and receiving a treatment.

A medical intake and release form must be filled out and signed by the participants.

Please note: those practitioners that currently own an Acutonics® Middle Ohm Unison Set (pictured above) and an Acuvator should bring them to the seminar. For attendees without tuning forks, tuning fork purchase is recommended. Acutonics® Middle Ohm Unison Set + Acuvator Seminar Kits will be available for purchase from Qiology via pre-order for a **seminar special price of AUD\$264 Inc GST**, and will be picked up by attendees at the commencement of the seminar. Please order with your seminar registration, or contact us for further details. Pre-orders available only. [Click here to order](#)

"Exceeds my expectations!! Both Mary Elizabeth and MichelAngelo are so eloquent and generous with their knowledge and many precious years of experience. I have learned more in 4 days than a whole term. I am thoroughly excited to apply the protocols within my future practice to help men and women achieve organic beauty, and optimal physical and emotional health."
